ABOUT ME

Aspiring cloud engineer with hands-on experience designing, provisioning, and maintaining cloud infrastructure on Oracle Cloud Infrastructure (OCI) and AWS with an ethical hacking background, focused on building secure cloud infrastructure. Currently deepening my expertise in cloud security and seeking a cloud engineer role with a security focus.

EXPERIENCE

Cloud Engineering Intern (Training Program), **Notionace (Aug 2026 - Sep 2026)**
• Completed OCI Foundations Associate and OCI Architect Associate training tracks through hands-on labs on the company's training platform.
•Designed and deployed OCI architectures in lab environments, including VCNs, public/private subnets, Internet, NAT, and Service Gateways, monitoring, and alerting.
• Delivered capstone projects on OCI and AWS (see Projects).

PROJECTS

OCI Architecture Capstone (Notionace lab platform)
Designed and deployed a secure multi-tier network on OCI with custom IAM policies, VCN, public and private subnets, and Internet, NAT, and Service Gateways. Configured NSGs/ security lists, load balancer, OCI keys, and Monitoring alarms with Notifications.

AWS Architecture Capstone
Built a VPC-based architecture with public/private subnets, IGW, and NAT Gateway, and provisioned EC2 and S3, applying IAM least privilege.

Rush (Ongoing)
A Bash-like Unix shell built from scratch in Rust to learn the language and systems programming concepts including process management, piping, I/O redirection, and logical operators. Features built-in commands, environment variable management, and command history while leveraging Rust's ownership model and memory safety guarantees to explore low-level Unix internals.

Stockwave
Developed a stock trading app resembling Zerodha as part of a college mini-project with a team of four. Utilized technologies such as React, Node.js, MongoDB and others to build a user-friendly interface and ensure smooth transactions. Focused on security, performance, and market data integration to create a realistic trading experience.

EDUCATION

Swami Vivekananda Institute of Technology (SVIT) (2021 - 2025)

SKILLS

- Networking
- Ethical Hacking (fundamentals)
- OCI (1Z0-1085-25)
- Windows
- Linux
- Python, Bash (basic scripting)
- AWS
- OCI
