ABOUT ME

Motivated cybersecurity enthusiast with hands-on experience in red teaming and penetration testing. Currently focused on expanding expertise into cloud security, with a strong passion for understanding how threats and defenses evolve in cloud environments. Eager to leverage offensive security skills to assess and protect cloud infrastructures. Actively building knowledge in cloud platforms and security protocols to ensure robust, scalable protection in today's evolving digital landscape.

EDUCATION

Dwaraka High School	(2008 - 2019)
Keshav Smarak Junior College	(2019 - 2021)
Swami Vivekananda Institute of Technology (SVIT)	(2021 - 2025)

PROJECTS

Stockwave

Developed a stock trading app resembling Zerodha as part of a college mini-project with a team of four. Utilized technologies such as React, Node.js, MongoDB and others to build a user-friendly interface and ensure smooth transactions. Focused on security, performance, and market data integration to create a realistic trading experience.

Rush (Ongoing)

A Bash-like Unix shell built from scratch in Rust to learn the language and systems programming concepts including process management, piping, I/O redirection, and logical operators. Features built-in commands, environment variable management, and command history while leveraging Rust's ownership model and memory safety guarantees to explore low-level Unix internals.

Portfolio web page

Created and developed a personal portfolio website on plain HTML, CSS, and vanilla JavaScript. It shows up projects, skills, and experience with clean responsiveness and smooth interactions. Minimal design, performance, and accessibility, without relying on frameworks, have been key features.

SKILLS

- Networking
- Ethical Hacking
- OCI (1Z0-1085-25)
- Windows
- Linux
- Python
- Currently learning: Cloud Fundamentals (AWS/Azure/GCP)
